

We are a diverse country with many different people, and many different beliefs and ways of living. A democracy. Our community, our communication must remain representational of this diverse community and should in no way be deregulated to represent and elite few. By the people for the people. We have already seen how a conglomerate such as Clear Channel could black list/witch hunt harmless popstars such as the Dixie Chicks, just because they were sarcastically playing to the crowd as performers. Our right is that of free speech, not marketed speech.
